Research Field

My research focuses on **minimally invasive breast surgery**, particularly the application of **robotic and endoscopic techniques** to improve oncologic safety and cosmetic outcomes.

Key areas of interest include:

- Robotic nipple-sparing mastectomy and technical optimization
- Endoscopic and robotic approaches for breast-conserving surgery
- Clinical outcomes and safety of robotic breast surgery
- Integration of genomic assays (e.g., multigene panels) in surgical decision-making
- Personalized treatment strategies in early breast cancer
